Government and Commercial Technology Challenges—We've Been There!

Nexus Solutions is a Veteran Owned Small Business with deep base of blended commercial and government expertise that is unprecedented for Washington businesses. We offer strategic and operational thought leadership, analysis and best practices with the entire enterprise in mind and not just one or two convenient silos. We leverage the collective past of our team to help our clients prepare for their future. Since no company can have every base covered internally our principals have one of the most extensive network of industry, technical and management resources in the business—period.

Nexus Solutions conducts business with the same integrity and adherence to Ethical Standards that have been the hallmark of our management team during their careers. Nexus gets the job done, does it right the first time and does it with integrity— separating us from other companies. These core values form the starting point for everything we do. All employees, partners and contractors are held to the same high standards that we use in all customer and business interfaces. Our commitment to transparency and collaboration provides our clients with the cost-effective innovative results that they want - but seldom get.
